

ACE UI TEST

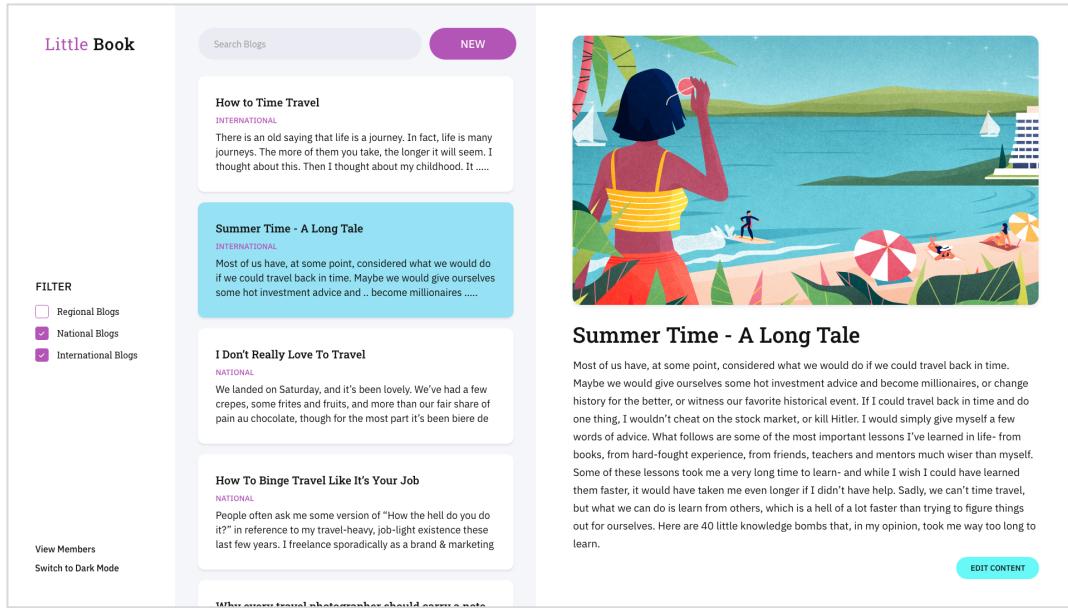

Use Case

“Little Book” is a single page application which enables user to add and read blogs. On page load, the user will be presented with the following view.

It's a single page application with an ability to switch between Light and Dark Modes.

Prototype Link

<https://xd.adobe.com/view/1a4a01e4-6c0e-4052-8ad5-639a10b9b712-4f19/?fullscreen>

Section 1 - Side Bar Container

This section contains Logo, Filter and Menu Items.

Filter Functionality

1. Dynamically change Blog List depending on the selected filter based on blog type (Regional/National/International etc).
2. The Blog Types in the filter are dynamic and should be constructed from the response of API #1.
3. On page load, all the filters will be checked by default.

Menu Functionality

1. On click of “View Members” open a modal with list of members fetched from API #2. The modal closes when clicked outside.

Little Book

Search Blogs NEW

How to Time Travel
INTERNATIONAL
There is an old saying that life is a journey. In fact, life is many journeys. The more of them you take, the longer it will seem. I thought about this. Then I thought about my childhood. It

Summer Time - A Long Tale
INTERNATIONAL
Most of us have, at some point, considered what we would do if we could travel back in time. Maybe we would give ourselves some hot investment advice and .. become millionaires

I Don't Really Love To Travel
NATIONAL
We landed on Saturday, and it's been lovely. We've had a few crepes, some frites and fruits, and more than our fair share of pain au chocolate, though for the most part it's been biere de

How To Binge Travel Like It's Your Job
NATIONAL
People often ask me some version of "How the hell do you do it?" in reference to my travel-heavy, job-light existence these last few years. I freelance sporadically as a brand & marketing

Members

Leanne Graham Gwenborough, Ervin Howell Wisokyburgh, Clementine Bauch McKenziehaven

Mrs. Dennis Schulist South Christy, Chelsey Dietrich Roscoevie, Patricia Lebsack South Elvis

Kurtis Weissnat Howemouth, Nicholas Runolfs Alyiaview, Glenna Reichert Bartholomebury

- On click of “Switch to Dark Mode”, change the UI to Dark Mode. Toggle between Light Mode and Dark Mode. All the views have their respective Dark Mode (Refer UX)

Note : This functionality is optional and don't have to be done as a part of UI TEST

EDIT CONTENT

Section 2 - Blog List

Functionality

- On load, populate the blog list with data fetched from API #1.

2. Search – The blog list must dynamically get updated based on user search terms (on key enter).
3. On click of a blog item, populate the description with corresponding content. Highlight the selected blog item.
4. New - On click of “New” button, open a modal to add blog.

5. Add Blog – New blog can be created by adding title and content. Add the newly created blog to the list of blogs.
6. All the newly added blogs should be stored in local storage.
7. New Blog Details
 - a. Name – As per user provides
 - b. Content – As per user provides
 - c. Image – Optional (Prefer having a default image)
 - d. Blog Type – Local

Section 3 - Blog Details

Functionality

1. On page load, this view will contain the description of the first blog by default.
2. On click of “EDIT CONTENT”, provide user the ability edit Title and Details of the blog.

The screenshot shows the Little Book application's user interface. On the left, there's a sidebar with a search bar labeled "Search Blogs" and a "NEW" button. Below the search bar is a "FILTER" section with three options: "Regional Blogs" (unchecked), "National Blogs" (checked), and "International Blogs" (checked). Underneath the filter is a "View Members" link and a "Switch to Dark Mode" link. The main content area displays a list of blogs in cards:

- How to Time Travel** (INTERNATIONAL): A card with a white background containing text about the nature of life as a journey.
- Summer Time - A Long Tale** (INTERNATIONAL): A card with a light blue background containing text about travel back in time.
- I Don't Really Love To Travel** (NATIONAL): A card with a white background containing text about travel experiences.
- How To Binge Travel Like It's Your Job** (NATIONAL): A card with a white background containing text about travel and work.

At the bottom of the list, there's a note: "When you're travel photographer should carry a note".

On the right side of the screen, there's a large, colorful illustration of a woman in a red and yellow striped dress standing on a beach, looking out at the ocean. The scene includes palm trees, a sailboat, and a city skyline in the distance. Below the illustration, the title "Summer Time - A Long Tale" is displayed in bold black text. Underneath the title is a paragraph of text followed by two buttons: "CANCEL" (blue) and "SAVE CONTENT" (purple).

3. During an edit process, if the user clicks another blog from the Blog List, then provide a warning pop up, before navigating away.
4. On save, update the title and details. Make sure the updated content reflects everywhere in the application.
5. On click of cancel, redirect the user to unedited state.

API

#1. Fetch Blogs

<https://jsonmockserver.vercel.app/api/blogs>

#2. Fetch Members

<https://jsonmockserver.vercel.app/api/users>

Response Example for Members

```
[  
  {  
    "id": 1,  
    "name": "John Doe",  
    "photo": "images/users/1.jpeg"  
    .....  
    .....  
  }  
]
```

For user images, append <https://jsonmockserver.vercel.app> before the URL returned from "photo".

Example : <https://jsonmockserver.vercel.app/images/users/1.jpeg>

Application Fonts (Google Fonts)

1. Roboto Slab

2. IBM Plex Sans
